

1. SPACE

- Adaptability and space are connected.
- The possibility of changing space and create overlapping functions

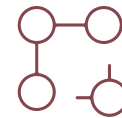

2. SYMBIOSIS

- Creating a programme with functions which can co-exist as well as stand on their own

3. CONSTRUCTION

- Creating a space without any restricting load bearing elements
- Interior components can be moved, assembled and dissembled

4. SEPARATE SYSTEMS

- Separated technical functions improves the possibility of future modification.
- Accommodation of one system, without interfering with the others.
